Education

University of North Carolina at Charlotte Aug 2024 – May 2026
B.A. Computer Science | Focus in Information Technology | Minor in Statistics *Charlotte, NC*

University of North Carolina at Charlotte Aug 2026 – Upcoming
M.S. Information Technology | Focus in Software Systems Design and Engineering *Charlotte, NC*

Skills

Cloud Platforms: Microsoft Azure, VMware, AWS

Programming: Java, JavaScript, Python, SQL, HTML CSS, VB.Net

Tools: VS Code, GitHub, Linux, MySQL, MS Office 365, Postman, Maven, Docker, VMware Workstation Pro, SAS

Backend & Frameworks: Spring Boot, RESTful API Design, Nodejs, Prisma, Express

Experience

Teaching Assistant Jan 2026 – May 2026
University of North Carolina at Charlotte *Charlotte, NC*

- Assisted with grading virtual labs, simulations, and quizzes for a Security+ aligned information security course
- Supported **80+** students in network and endpoint security, threat mitigation, authentication & access control, and cloud security fundamentals
- Helped students understand CompTIA Security+ concepts through interactive labs while maintaining academic integrity standards

IT Systems Engineer Intern Jun 2024 – Aug 2024
Mecklenburg County *Charlotte, NC*

- Built and managed **10+** virtual machines using Microsoft Azure and VMware, supporting county-wide IT operations.
- Maintained server storage, backup systems, and print services ensuring **99%** uptime across services
- reducing service ticket resolution time by **15%** through system performance and optimization

Technician Jun 2022 – May 2025
Select Home Tech *Charlotte, NC*

- Installed and configured **80+** home/office networks, resolved tech issues, performed system upgrades
- Performed system upgrades, improving overall client system performance and reliability

Projects

Book Club API | *Node.js, Express, PostgreSQL, Prisma* May 2026

- Built a RESTful API with **10+ endpoints** supporting users, books, and clubs with role-based access control
- Secured API using JWT authentication and bcrypt, protecting **100%** of user account operations
- Documented and tested endpoints with Swagger and Postman and deployed on Render.

Identity Access Service | *Node.js, Express, PostgreSQL, Prisma* Jan 2026

- Built a REST API for managing user identity and access, with **7+** endpoints handling registration, login, and role based permissions
- Hashed passwords with bcrypt and issued JWT tokens on login, so users stay signed in without sending credentials on every request
- Added input validation with Zod and rate limiting on the login route to block brute force attempts

File Storage Service | *Azure, PostgreSQL, Spring Boot* Dec 2025

- Built a Spring Boot REST API with Azure Blob Storage and Postgre SQL supports **4+** file operation with cloud-based storage
- Implemented RESTful endpoints using Spring Data JPA and Maven, validating **10+** API calls with Postman and curl

Leadership & Involvement

Association of Computing Machinery (ACM Club) Aug 2022 – May 2026

- Participated in projects, **5+** hackathons, and multiple software development workshops
- Collaborated with other members on coding challenges and shared ideas at club meetings

Blacks in Technology (BIT Club) Sept 2024 – May 2026

- Engaged in events supporting Black tech students via events, career prep, and collaboration
- Attended networking sessions to connect with other students and professionals in tech

Computing Leaders Aug 2025 – Dec 2025

- Delivered **5+** K–12 computing lessons, developed teacher lesson plans and led STEAM Expo booths activities
- Helped younger students learn basic coding concepts in a fun & easy to understand way
