SUMMARY

Cybersecurity-focused Computer Science graduate pursuing an M.S. in Information Technology with experience in IAM, Active Directory, Microsoft Entra ID, cloud infrastructure, and security monitoring. Hands-on experience with access management, least privilege, threat detection, and security lab environments. Seeking entry-level IAM, SOC, or cloud security opportunities.

EXPERIENCE

IT Systems Engineer Intern | Mecklenburg County, Charlotte, NC Jun 2024 – Aug 2024

- Administered user accounts, access permissions, and role assignments across Active Directory and Microsoft Entra ID, applying least-privilege access across county-wide operations
- Built and managed 10+ virtual machines in Azure and VMware vCenter/vSphere; maintained 99% uptime across servers, backups, and print services
- Administered Rubrik backup integrated with vCenter, replicating on-premises VM backups to Azure cloud storage for data protection and recovery
- Reduced ticket resolution time by 15% through proactive system and performance optimization

Technician | Select Home Tech, Charlotte, NC Jun 2022 – Jul 2026

- Installed and configured 80+ home and office networks, resolving connectivity and hardware issues and performing on-site system upgrades
- Troubleshot hardware, software, and network issues across computers, printers, routers, and other connected devices
- Provided on-site technical support, explaining troubleshooting steps and solutions to customers with varying levels of technical experience

PROJECTS

Active Directory Detection Lab | Windows Server, PowerShell, Sysmon, Wazuh, Kali Linux 2026

- Built a multi-VM Active Directory domain and automated user, group, and OU provisioning with a custom PowerShell script
- Instrumented the domain with Sysmon and a SIEM, then executed and detected identity attacks by mapping activity to Windows event IDs and writing detection queries
- Mapped privilege-escalation paths with BloodHound and documented each attack-to-detection cycle

IAM Access-Hygiene Audit Tool | PowerShell, Active Directory 2026

- Built a PowerShell tool that audits Active Directory for stale, disabled, and over-privileged accounts and exports findings to CSV to support access reviews and least-privilege cleanup

Phishing Email Analyzer | Python, SPF/DKIM/DMARC 2026

- Built a read-only Python triage tool that parses .eml files and flags display-name spoofing, Reply-To/Return-Path mismatches, SPF/DKIM/DMARC failures, and deceptive links (brand look-alikes, shorteners, raw IPs, punycode)

Identity & Access Management Service | Node.js, Express, PostgreSQL 2025

- Designed an IAM service enforcing role-based access control and least-privilege authorization, with secure authentication (JWT, bcrypt) and hardened input validation and rate limiting

Digital Forensics Investigations | Autopsy, The Sleuth Kit, ExifTool 2026

- Examined E01 disk images, verifying integrity via MD5/SHA-1 hashing; recovered deleted files through carving, extracted EXIF/GPS metadata and registry artifacts, and built evidence timelines cross-validated across multiple toolsets

Security Usability & Risk Assessment | Proton Pass, Nielsen Heuristics 2025

- Evaluated a password manager against Nielsen usability heuristics, rating ~10 findings on a 0–4 severity scale; surfaced security gaps including weak system feedback, no password-strength enforcement, and unclear vault lock status

SKILLS

Security & IAM: Identity & Access Management, RBAC, Least Privilege, Access Reviews, Authentication & Authorization, MFA, Security Monitoring, Threat Detection, Incident Response
Cloud & Systems: Microsoft Azure, Microsoft Entra ID, Active Directory, Windows Server, VMware vSphere/vCenter, Microsoft 365, Linux
Security Tools: Wazuh, Sysmon, BloodHound, MITRE ATT&CK, Rubrik, Git/GitHub, Docker
Scripting & Development: PowerShell, Python, Bash, SQL, Node.js, Express, PostgreSQL, REST APIs, Rust
Networking & Support: Network & Wireless Troubleshooting, Hardware Troubleshooting, System Configuration
Forensics & Analysis: Autopsy, The Sleuth Kit, ExifTool, File Carving, Registry Analysis, Hashing, Phishing Analysis

EDUCATION

University of North Carolina at Charlotte May 2026
B.A. Computer Science | Concentration in Information Technology | Minor in Statistics

University of North Carolina at Charlotte Aug 2026 – May 2028
M.S. Information Technology | Concentration in Information Security & Privacy

LEADERSHIP & INVOLVEMENT

- **Association for Computing Machinery (ACM):** 5+ hackathons and software development workshops 2022–2026
- **Blacks in Technology (BIT):** career-prep events and tech networking sessions 2024–Present
- **Computing Leaders:** delivered 5+ K–12 computing lessons and led STEAM Expo activities 2025
