EXPERIENCE

Teaching Assistant | *UNC Charlotte, Charlotte, NC*

Jan 2026 – May 2026

- Taught 80+ students core security concepts authentication, access control, endpoint security, threat mitigation, and cloud security fundamentals for a CompTIA Security+ aligned course
- Graded virtual labs and simulations; explained technical concepts to students at varying skill levels while maintaining academic integrity

IT Systems Engineer Intern | *Mecklenburg County, Charlotte, NC*

Jun 2024 – Aug 2024

- Administered user accounts, access permissions, and role assignments across Active Directory and Microsoft Entra ID applying least-privilege access across county-wide operations
- Built and managed 10+ virtual machines in Azure and VMware vCenter/vSphere; maintained 99% uptime across servers, backups, and print services
- Administered Rubrik backup integrated with vCenter, replicating on-premises VM backups to Azure cloud storage to support data protection and recovery
- Reduced ticket resolution time by 15% through proactive system and performance optimization

Technician | *Select Home Tech, Charlotte, NC*

Jun 2022 – May 2025

- Installed and configured 80+ home and office networks; resolved connectivity and hardware issues and performed on-site system upgrades

PROJECTS

Active Directory Detection Lab | *Windows Server, PowerShell, Sysmon, Wazuh, Kali Linux*

Jul 2026

- Built a multi-VM Active Directory domain and automated user, group, and OU provisioning with a custom PowerShell script
- Instrumented the domain with Sysmon and a SIEM, then executed and detected identity attacks by mapping activity to Windows event IDs and writing detection queries
- Enumerated domain privilege-escalation paths with BloodHound and documented each attack-to-detection cycle with tuning notes

Identity & Access Management Service | *Node.js, Express, PostgreSQL*

Jan 2026

- Designed an IAM service enforcing role-based access control and least privilege authorization across user roles
- Implemented secure authentication with JWT session tokens and bcrypt password hashing to protect stored credentials
- Hardened the login flow with input validation and rate limiting to mitigate brute-force and injection attacks

Book Club API | *Node.js, Express, PostgreSQL, Prisma*

May 2026

- Enforced role based access control and automated user provisioning across roles, modeling identity lifecycle management
- Secured 100% of user account operations with JWT authentication and bcrypt hashing

File Storage Service | *Azure, Spring Boot, PostgreSQL*

Dec 2025

- Deployed a cloud-native file service on Azure Blob Storage with authenticated REST endpoints, applying secure access patterns to stored data

EDUCATION

University of North Carolina at Charlotte

May 2026

B.A. Computer Science | Concentration in Information Technology | Minor in Statistics

University of North Carolina at Charlotte

Aug 2026 – May 2028

M.S. Information Technology | Concentration in Information Security & Privacy

SKILLS

Security: Identity & Access Management, Role-Based Access Control, authentication & authorization, JWT, password hashing, endpoint & cloud security fundamentals

Cloud & Virtualization: Microsoft Azure, AWS, VMware vSphere/vCenter, virtual machines, Azure Blob Storage, Rubrik backup

Infrastructure & Systems: Active Directory / Microsoft Entra ID (Azure AD), Windows Server, Microsoft 365, server management

Networking: LAN/WAN, VPN, network security fundamentals, connectivity troubleshooting

Operating Systems: Windows, Linux, macOS

Programming & Scripting: Python, Bash, JavaScript, Java, SQL, Node.js, HTML/CSS

Tools: Git/GitHub, Docker, Postman, PostgreSQL

LEADERSHIP & INVOLVEMENT

- Association of Computing Machinery (ACM): participated in projects, 5+ hackathons, and software development workshops
- Blacks in Technology (BIT): engaged in career prep, networking, and events supporting Black tech students
- Computing Leaders: delivered 5+ K-12 computing lessons and led STEAM Expo booth activities
